

# MRSD COVID-19 TECHNOLOGY GUIDELINES

## MRSD Board Policies

[IIBG Computer Technology](#)

---

### Technology Practices

During the COVID-19 Pandemic, Molalla River School District(MRSD) understands the importance and priority of technology in the school setting. MRSD acknowledges two unique priorities with the use of technology that do not exist in routine academic proceedings. This includes:

1. Infection prevention related to shared equipment.
2. Need for increased technology access related to hybrid and distance learning.

Because of these factors, MRSD will prioritize funds to gain one Chromebook per students that go be used both at home and at school to reduce shared technology. These devices will need to be transported between school and home by students grades 3-12.

The use of computer lab use will be discouraged, when labs are used, equipment will be sanitized after use, before other students or staff use equipment.

Use of technology will be consistent with existing technology policies and use agreements, as per board policies.

When students check out devices in the schools setting, appropriate PPE and/or physical distancing will be maintained. Devices being returned should be cleaned prior to subsequent use.

If long term checks out of devices is warranted for full time distance learning because re-closure of school, appropriate physical distancing measures and personal protective measures will be practiced during these transactions including drive up check out and return as needed.

### Sanitizing Process

When equipment must be sanitized, it should not be sprayed directly. Equipment should instead be wiped down with appropriate disinfecting wipe or with a cloth that is sprayed lightly with disinfectant.
